Project Information

Elgin Wastewater Compliance, Collection Improvements (Planning/Preliminary Engineering)
Project Name: (e.g., Stayton Water System Improvements)

Opportunity/Problem

Briefly describe the opportunity or problem facing the applicant:

City's wastewater system experiences significant I/I, especially in the winter months. Wastewater lagoons can accommodate high flow I/I events better than other technologies. Historical Infiltration and Inflow (I/I) events into the system have been less than 1.0 mgd. However, this February flows into the WWTP exceeded 1.0 mgd, backed up the collection system and caused a sanitary sewer overflow (SSO) event. The significantly high I/I event inundated the influent lift station and required bypass pumping upstream of the influent lift station into Cell #1. Further, landslide that impacted the hydraulic transfer structure between Cell #2 and #3, requiring emergency pumping between Cells #1& #2 into Cell #3. The collection system was constructed in 1964 and includes 63,156 lineal feet of 8-, 10-, & 12-inch pipes. The original installation included rubber gasketed asbestos concrete pipe (AC).

Response to Opportunity/Problem

Briefly describe the major alternatives considered to address this opportunity or problem:

Do nothing - would result in additional compliance warnings or fines from DEQ and could pose health risks.

Begin study and planning for sewer rehab - would result in compliance and improve the long-term performance of the City's sewer system.

Detailed Project Description

Clearly describe the proposed project work to be accomplished:

The City's objective is to develop a sanitary sewer Preliminary Engineering Report (PER) that evaluates the current condition of the City's sanitary sewer to identify critical pipelines for replacement, prioritization, and develop an implementation plan based on available funds. The PER will incorporate results from the City's on-going CCTV inspection and condition analysis.

Project Work Plan

List project activity milestones with estimated start and completion dates. Identify estimated date of first cash draw:

Activity	Estimated Date	
	Start	Completion
Preliminary Engineering Study	Aug 25, 2017	Oct 1, 2017
Agency approval	Oct 1, 2017	Oct 31, 2017
City approval	Nov 1, 2017	Nov 30, 2017

Estimated First Draw Date: Aug 25, 2017

Project Budget

IF THIS APPLICATION IS FOR COMMUNITY DEVELOPMENT BLOCK GRANT (CDBG) OR SAFE DRINKING WATER REVOLVING LOAN FUND (SDWRLF) PROGRAM FUNDING, PLEASE SKIP THIS BUDGET TABLE AND COMPLETE THE PROJECT BUDGET INCLUDED IN THE PROGRAM-SPECIFIC APPLICATION SUPPLEMENT FORM.

List individual project budget line items with requested budgeted amounts by IFA and non-IFA funding sources. Change budget column labels to identify the specific requested IFA funding sources. Non-IFA sources are those funds other than those requested from IFA.
